PROJECTS

Learning Management System

- A learning management that gives registered users access to free online programming courses assisted by a roadmap in becoming a software developer and an interactive tech community that helps users network with others.
- This project was built with the collaboration of a team of 10 developers using **HTML**, **CSS**, **JAVASCRIPT**, **REACT.JS**-Hooks, Router, Redux and other programming tools. <https://teachify-learning.netlify.app>

Online Book Store

- An online bookshop that allows users to buy books which are added to a cart. Users can purchase more or remove items from their cart.
- Built with **react-redux** and the user purchased data is managed by **firebase**. <https://onlinebookshelf.netlify.app/>

Registration Form

- A registration form that allows users to input their name and age only. Built with **react hooks** utilizing props.
<https://registrationinput.netlify.app>

News Media

- An online static news platform where users can view tech related information. Developed with **HTML, CSS AND JAVASCRIPT**.
<https://themeidanews.netlify.app/>

Landing Pages

- Recreated an online cleaning service landing page, Facebook registration landing page and goggle home landing page built with **HTML and CSS**. <https://procleaners.netlify.app/> | | <https://googlesearchpagerecreated.netlify.app/> | | <https://facebookregpage.netlify.app/>
